It is my opinion that the U.S.G. is spending a lot of time trying to find a dead horse. The several states that are pushing to get a verdict friendly to them are just plain greedy. They (the states) hopped on a band wagon to get "free dollars". The thing that one must do at this point of time is say that they will suffer no more expenses, fire their lawyers and say that is enough. Not being a lawyer it is apparent that the USG has recovered many dollars through income tax and other methods.  
thank you .
